### Projects

- **RP Alloys :**  
<https://github.com/akshay643/rp-alloys-f>
- **Project :** Machine Maintenance Application(OEE Application)  
**Environment:** WordPress, PHP, MySQL, Ajax, jQuery, Highcharts, Bootstrap  
**Role & Responsibilities:** Database Design, Theme Design and Development  
**Description:**  
Machine maintenance application overcomes all the challenges that a manufacturing plant faces with respect to its downtime. The application effectively schedules routine maintenance for machines, while minimizing the downtime. Machine maintenance engineer can assign, review, and track machine maintenance operations through this ERP, the machine engineer can schedule and assign Breakdown activities, Change Over, CLRI, and Preventive Maintenance to the maintenance operator. The a maintenance engineer can also monitor the status of the assigned activities in real time. All the required data related to the machine is consolidated and made readily available.
- **Project :** FLO  
**Environment:** WordPress, PHP, MySQL, Ajax, jQuery, Highcharts, Bootstrap  
**Role & Responsibilities :** Database Design, Theme Design and Development  
**Description:**  
FLO is an Enterprise Process Management System (EPMS) that exploits the potential of process-based working to deliver exemplary business results. It's a robust tool that aids identification and elimination of Non-Value Add (NVA) processes, reduces Enabling Value Add (EVA) and maximizes Value Add (VA) processes without any break. It creates and promotes an enterprise-wide ecosystem to help prepare, store and access processes dynamically in real-time. The business logic instilled in the software has potential to guide a business towards desired level of success. This well-designed and implemented process transforms knowledge accumulated by individuals over a period of time in an interface with organizational knowledge.
- **Virtual Store:**  
**Tools used :** HTML, CSS, Bootstrap  
**Link -** <https://conceptsandsolutions.in/virtualstore/#connect>
- **Portfolio website:** Created my portfolio site using HTML for layouting, CSS & Bootstrap for styling and functioning. Also used Javascript libraries ( JQuery, AOS ) to make it more dynamic.  
**Tools used :** HTML, CSS, JavaScript, Bootstrap  
**Link -** <https://akshay643.github.io/Portfolio.github.io/>

- **Word Counter:** A small project fully based on JavaScript in which we can count the letters and words written in the message box.

Tools: HTML, CSS, JavaScript
